DETAILED ACTION

Response to Amendment

1. Applicants' amendments and arguments, see amendment, filed on 8/8/2004, with respect to Claims 6-14, 16, 19-21 and 23-25 have been fully considered and are persuasive. The 35U.S.C.103 rejections have been withdrawn. None of the previously cited reference teaches the Claims 6-14, 16, 19-21 and 23-25.

Claims 1-5, 15, 17-18 and 22 had been canceled.

Allowable Subject Matter

2. Claims 6-14, 16, 19-21 and 23-25 are allowed.

Examiner's Statement of Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The prior art along or in combination fails to teach or make obvious the following limitations:

"a second network that includes two or more subnetworks and a second agent; and registering the mobile node with the second agent such that the mobile node is provided a unique globally reachable address different from a home address of the mobile node, enabling the mobile node to transition from any of the subnetworks to another subnetwork without communicating to the first agent information about the transition and without communicating to the second agent

information about a security association between the mobile node and the first agent; wherein the second network includes a third agent associated with one of the subnetworks, wherein the third agent includes a subnet agent or DHCP OR DRCP server" as recited in the independent claims 6-9.

"a second network that includes two or more subnetworks and a second agent; and registering the mobile node with the second agent such that the mobile node is provided a unique globally reachable address different from a home address of the mobile node, enabling the mobile node to transition from any of the subnetworks to another subnetwork without communicating to the first agent information about the transition and without communicating to the second agent information about a security association between the mobile node and the first agent; providing by the mobile node the globally reachable GCOA to the first agent" as recited in the independent claims 10 and 12.

"a second network that includes two or more subnetworks and a second agent; and registering the mobile node with the second agent such that the mobile node is provided a unique globally reachable address different from a home address of the mobile node, enabling the mobile node to transition from any of the subnetworks to another subnetwork without communicating to the first agent information about the transition and without communicating to the second agent information about a security association between the mobile node and the first agent; wherein providing a mobility server in the second network; allocating dynamically by the mobility server one of the at least two second agents; and

registering the mobile node with the allocated second agent” as recited in the independent claim 16.

“a second network that includes two or more subnetworks and a second agent, wherein the second agent is programmed to allow the mobile node to transition from any of the subnetworks to another subnetwork without communicating information to the first agent about the transition and without communicating to the second agent information about a security association between the mobile node and the first agent; wherein the second agent includes a dynamic tunneling agent” as recited in the independent claims 19-21, and

“a second network that includes two or more subnetworks and a second agent, wherein the second agent is programmed to allow the mobile node to transition from any of the subnetworks to another subnetwork without communicating information to the first agent about the transition and without communicating to the second agent information about a security association between the mobile node and the first agent; wherein the second network includes a third agent associated with one of the subnetworks, wherein the third agent includes a subnet agent or DHCP OR DRCP server” as recited in the independent claims 23-25.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany
